

ANTEA OX

ANALYZE YOUR POOL'S ORP WITH A CONNECTED ANTENNA

SMART ANTENNA

Antea OX is a connected antenna that collects ORP sensor readings and transmits them to a Vigipool salt chlorinator for optimum control of pool water quality. Designed to be perfectly compatible with Vigipool salt chlorinators, the Antea OX makes integration quick and easy.

INTUITIVE APPLICATION

The Antea OX adds the "regulated" mode into salt chlorinators set up modes, so that the Vigipool salt chlorinator produces chlorine depending on a set point and ORP readings. The data is directly available on an intuitive application: Vigipool.

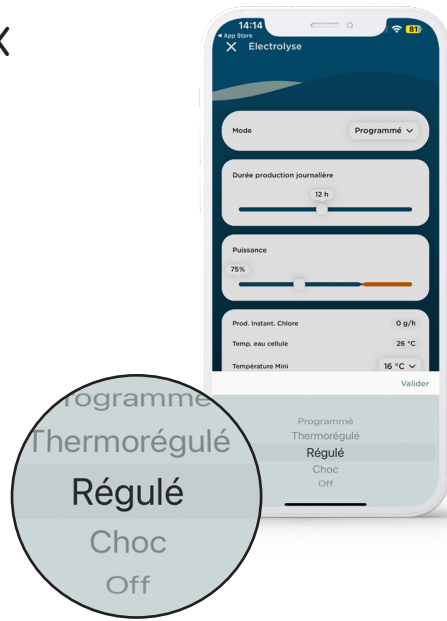

QUICK INSTALLATION

Antea OX can be installed and configured in just a few seconds! Plug the antenna into a 230V socket and connect it to your device.

LIMIT EXCESS CHLORINE WITH ANTEA OX

-  Limits excess chlorine: Thanks to precise control of chlorine levels, Antea OX avoids overdosing, ensuring healthy and safe pool water for swimmers.
-  Antea OX is specially designed to be compatible with Vigipool salt chlorinators, ensuring easy integration and optimum performance.
-  Disinfectant potential visualization: The antenna provides real-time visualization of the water's disinfectant potential, giving users greater understanding and control of their pool's water quality.

ULTRA-SIMPLIFIED EQUIPMENT

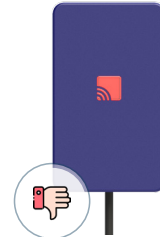

In just a few clicks, pair the device of your choice by Wifi or Bluetooth. If the Antea OX button remains green, your device is connected via Wifi; if it's purple, you're connected via Bluetooth. There's more! The box can be placed outside the equipment room for better reception of the Wifi network!

GREEN: ANTEA VP IS CONNECTED VIA WIFI

PURPLE: ANTEA VP IS CONNECTED VIA BLUETOOTH

RED: ANTEA VP IS NOT CONNECTED

VIGIPOOL: THE TECHNICAL ROOM IN YOUR PHONE

Vigipool is your new smartphone application that lets you keep your equipment room in your pocket at all times. With this application, you can centralize your equipment in the equipment room and control your home's Wifi-connected devices from anywhere in the world.

AN UPGRADEABLE SOLUTION:

For an even more complete installation, add Vigipool-compatible devices to your equipment room and view new functions in your application, such as Ofix VP (pH / ORP analyzer), Phileo VP (pH control), Zelia VP (salt chlorinator), ...
